

# Current Customer

Bulbasaur

Dropdown pull customer names from the keys of ACCOUNTS

# Accounts

Account 0

N.NN

Account N

N.NN

Account cards should be populated when a new customer is selected. The top part should have the account name and the bottom should have the account balance. Amounts in ACCOUNTS are in cents, so 100 should be formatted to 1.00.

# Transfer Money

Amount

Amount to transfer to another account. The required validation is the amount is less than what is in the From Account. The amount should accept dollars and then cast that to cents, e.g. 1.00 in the input becomes 100 in the object
